Mexico (COFEPRIS)	Compliant

Phytofuse Renew® Code: 16586

Attention must be paid to the use of Phytofuse Renew® in the equivalent of OTC formulations (eg. quasi-drugs in Japan, or therapeutic goods in Australia). Some countries maintain restricted inventories of raw materials that can be used in those applications so more detailed guidance may be required.

Phytofuse Renew® and its components and impurities are in compliance with the rules governing cosmetic products in the European Union (Directive 76/768/ECC & Regulation No. 1223/2009). The recommended use levels for Phytofuse Renew® is 1.00 – 10.00%.

Phytofuse Renew® is in compliance with the standardized set of rules developed and approved by the NPA (Natural Products Association).

Phytofuse Renew® is verified compliant to the Soil Association® Certification Ltd. Standards for Non-Organic Ingredients for use in Soil Association-Certified Health & Beauty Care products.

Phytofuse Renew™ is considered a non-hazardous material. All significant toxicological routes of absorption have been considered as well as the systemic effects and margin of safety (MoS) based on a no observed adverse effects level (NOAEL). Due to the restriction placed on animal testing of cosmetic raw materials, and Active Concepts, LLC's internal non-animal testing policy, this product was not tested for NOAEL.

Phytofuse Renew® was tested using *in vitro* dermal and ocular irritation models. This product was found to be non-irritating in both models.

To our knowledge the above material is free of CMR (*) substances, as defined according to Regulation (EC) No 1272/2008 and Cosmetic Regulation (EC) No 1223/2009 as amended.

(*) Carcinogenic, Mutagenic, toxic for Reproduction

Active Concepts, LLC certifies that to the best of our knowledge our product does not contain any material listed on California Proposition 65.

Active Concepts, LLC certifies that Phytofuse Renew® does not contain any materials prohibited by Halal laws.

Phytofuse Renew® is REACH Compliant and free of the following:

- Formaldehyde or formaldehyde donors
- Glycol Ethers
- Gluten
- Lactose
- Nanoparticles
- Nitrosamines
- Palm oil/palm kernel oil (or derivatives)
- Parabens
- Paraffin/petroleum products
- Phthalates
