Product Name: ACB Yogurt Extract

Code: 20070

INCI Name: Water & Yogurt Extract

ACB Yogurt Extract is manufactured by first fermenting milk with *Lactobacillus bulgaricus* and *Streptococcus thermophiles* to produce yogurt. The yogurt then undergoes an aqueous extraction before filtration.

Yogurt is commonly and widely used in global food and nutritional wellness products. Therefore it may be classified as Generally Recognized as Safe (GRAS) according to the FDA's Federal Food, Drug and Cosmetic Act.¹

The act states:

Any substance that is intentionally added to food is a food additive, that is subject to premarket review and approval by FDA, unless the substance is generally recognized, among qualified experts, as having been adequately shown to be safe under the conditions of its intended use, or unless the use of the substance is otherwise excluded from the definition of a food additive.¹

ACB Yogurt Extract was tested using *in vitro* dermal and ocular irritation models. This product was found to be non-irritating in both models. The full report is attached for reference.

A cellular viability assay conducted on ACB Yogurt Extract showed that it is capable of increasing cellular metabolism and viability.

The above information supports the safety of ACB Yogurt Extract in cosmetic applications at use levels of 1-5%. No further testing is required at this time.
