Euterpe Oleracea Sterols & Linoleic Acid & Oleic Acid & Linolenic Acid	ABS Acai Sterols EFA/Active Concepts	<b>3.00</b>
Glycine Soja (Soybean) Seed Extract & Ceramide 3	AC Phyto Oil C3/Active Concepts	<b>2.00</b>
Bis-Diglyceryl Polyacyladipate-2	Softisan® 649/ Sasol	<b>6.50</b>
<b>Phase II</b>		
Glycine Soja (Soybean) Seed Extract & Phospholipids & Glycyrrhiza Glabra (Licorice) Leaf Extract & Citrus Limon (Lemon) Peel Extract	AC MVS Cooling/ Active Concepts	<b>10.00</b>
Flavor/Fragrance (Optional)	N/A	<b>1.00</b>

### Manufacturing Process:

**Phase I:** Combine Phase I ingredients using propeller agitation and heat to 78°-80°C. Mix for 15 minutes.

**Phase II:** Begin force cooling. When temperature cools to 60°C switch mixing to side sweep agitation. Charge in Phase II ingredients and mix down to 40°C. Pour into suitable containers.
