AC Griffonia Lysate Advanced

Start:

Griffonia simplicifolia seeds are sourced from an agribusiness in Ghana, Africa and shipped to our three manufacturing sites in the USA, Italy, and Taiwan.

Final stop:

The final product is AC Griffonia Lysate Advanced, a neurocosmetic material that takes advantage of the 5-HTP content in griffonia seed cells for immediately perceived results and long-term anti-aging benefits.

Road Map Tour

The cells are isolated from the Griffonia simplicifolia seed followed by an aqueous extraction and the addition of Leuconostoc/Radish Root Ferment Filtrate.

Sustainably Blossoming Neurocosmetics

Our agribusiness supplier in Ghana, Africa was created by a determined woman back in 2012. She traveled far to meet farmers and artisans who produced non-toxic products by using traditional farming methods. Now, she prefinances their products and sources good buyers who believe in fair trade. This mother company was able to create a subsidiary agribusiness that focuses on promoting accessibility of organic and natural ingredients from Africa to the rest of the world. This astonishing achievement was made by integrating technology with organic farming. This agribusiness is committed to the following 6 sustainable development goals in hope of transforming not only the world, but their community: good health and well-being, gender equality, decent work and economic growth, reduced inequalities, responsible consumption and production, and partnerships for end goals. Our supplier is proud to be in partnership with 7 cooperatives and works with over 12,000 small-scale farmers around Africa.

We want to be transparent in our supply chain from harvest to production. It's important to know where our raw materials come from and where they are going.

Safety & Toxicology

Non-phototoxic

Non-irritant to skin

Non-sensitizing

Non-irritant to eyes

Non-harmful to aquatic life

Regulatory

INCI: Griffonia Simplicifolia Seed Extract

CAS: 999999-99-4

EUROPE: Compliant

USA: Compliant

JAPAN: Compliant
