# SKINCARE SCIENCE, BODY-LEVEL IMPACT

## Beau.dy Power

Many areas of the body are often overlooked in daily care, receiving attention only when visible concerns—such as back acne, pigmentation, or rough texture—appear. While solutions for facial issues like dullness or hyperpigmentation are readily available, body-specific concerns remain under-addressed, leaving many consumers feeling overlooked. The body's skin often reflects both mental and physical stress, showing signs such as breakouts, dryness, irritation, or flare-ups of conditions like eczema and acne. Elevated cortisol levels, the body's primary stress hormone, can heighten skin sensitivity, making these issues more pronounced. This gap presents an opportunity for consumers to extend the same care they give their faces to their bodies. As at-home wellness rituals gain popularity, spa-inspired routines that reduce stress and nurture skin health are becoming essential for both confidence and overall well-being. What began as self-care facial rituals is now evolving into full-body skincare experiences—addressing neglected areas, restoring balance, and prioritizing whole-body health.

Today's leading brands are seizing this opportunity by creating body care lines infused with the same high-performance active ingredients once reserved for facial skincare. The distinction between body care and facial skincare is becoming increasingly hazy. Nowadays, consumers anticipate high-end textures and face-grade active ingredients in body care products. Important features include: utilization of retinol, peptides, niacinamide, hyaluronic acid, and layering techniques—all featured in finished products such as boosters, mists, and body serums. There is a growing demand for body care products that support the skin's natural microbiota and reinforce the skin barrier, especially among those with dry, sensitive, or reactive skin. Ingredients like ceramides, prebiotics, PHAs, and probiotic ferments are gaining popularity for their gentle yet effective benefits. While body contouring and anti-cellulite solutions remain top priorities, today's consumers are increasingly seeking clean, science-backed formulas that also deliver mood-boosting benefits. Holistic ingredients like adaptogens, sensorial, and innovative textures are gaining traction as part of elevated self-care rituals.

Body care, elevated.

# Sample Formulations

# Super Moist Body Wash

This shower gel gently cleanses the skin while providing intense moisture, leaving it soft, smooth, and nourished. Enriched with botanical extracts, it helps maintain the skin's natural balance and prevents dryness. Perfect for daily use, it creates a rich, creamy lather that refreshes both body and mind. Floral and musky notes.

	Featured Active	INCI Name	Mechanism	Multifunctional Benefits
	20612PF AC Foaming Rice PF	Sodium Cocoyl Hydrolyzed Rice Protein	Protein extracted from rice provides a plant-based alternative, offering functional benefits like film-forming and strengthening.	<ul style="list-style-type: none"> <li>• Foaming</li> <li>• Nourishing</li> <li>• Conditioning</li> </ul>

Exfoliate the natural glow

# Minty Post Biotic Deodorant

This refreshing postbiotic deodorant is designed to support the skin's natural microbiome while providing natural odor protection. Formulated with postbiotics and gentle, plant-based ingredients, it helps balance the skin and reduce odor, leaving you feeling refreshed throughout the day. Its lightweight, non-sticky texture absorbs quickly without clogging pores, making it ideal for sensitive skin. Enjoy a clean, invigorating scent with every application. Floral, green notes.

	Featured Active	INCI Name	Mechanism	Multifunctional Benefits
	10950 AC Saccharomyces Ferment	Saccharomyces Ferment	Metabolites released by yeast ferments. With a higher molecular weight, they no longer evaporate easily from the skin, helping to naturally reduce odor.	<ul style="list-style-type: none"> <li>• Skin Conditioning</li> <li>• Deodorizing</li> <li>• Hygiene Products</li> </ul>
	10405PF ABS Ginger Mint Cooling Extract PF	Water & Zingiber Ofnale (Ginger) Root Extract & Mentha Piperita (Peppermint) Leaf Extract	A unique blend of ginger root and peppermint leaf extracts designed to provide a pleasant cooling effect.	<ul style="list-style-type: none"> <li>• Aesthetic Enhancement</li> <li>• Cooling Sensation</li> <li>• Anti-Inflammatory</li> </ul>
	20351PF ACB Wasabi Extract PF	Lactobacillus/Wasabia Japonica Root Ferment Extract	Thanks to unique antioxidant and antimicrobial properties, fermented wasabi extract can help protect the skin and scalp.	<ul style="list-style-type: none"> <li>• Natural Antimicrobial</li> <li>• Antioxidant</li> <li>• Skin &amp; Scalp</li> </ul>
	12000 Bio-Water Bamboo	Lactobacillus/Arundinaria Gigantea Ferment Filtrate	Enhance epidermal slip and formulation aesthetics while promoting moisturization for improved skin, scalp, and hair health.	<ul style="list-style-type: none"> <li>• Moisturizing</li> <li>• Conditioning</li> <li>• Silica Replacement</li> </ul>
	20606PF Phytogel PF	Hydrolyzed Fucus Vesiculosus Protein & Leuconostoc/Radish Root Ferment Filtrate	A botanical replacement mimicking animal gelatin by utilizing seaweed. It provides a powdery yet soft, flexible film aesthetic on the skin.	<ul style="list-style-type: none"> <li>• Film-Forming</li> <li>• Moisturizing</li> <li>• Viscosity Modifier</li> </ul>
	M14005 Probiocin V™	Lactobacillus Ferment Lysate	Postbiotic activity that delivers moisturizing and redness reducing benefits to help calm sensitive skin.	<ul style="list-style-type: none"> <li>• Conditioning</li> <li>• Moisturizing</li> <li>• Redness Reducing</li> </ul>
	M14003 AMTicide® Coconut	Lactobacillus & Cocos Nucifera (Coconut) Fruit Extract	Created by fermenting coconut fruit with <i>Lactobacillus</i> to deliver a non-irritating, antifungal, and effective multifunctional product.	<ul style="list-style-type: none"> <li>• Antifungal</li> <li>• Conditioning</li> <li>• Moisturizing</li> </ul>
