

A large, vertical hourglass is the central background element. The top bulb is filled with dark, granular material, while the bottom bulb is empty and shows the glass's texture. The narrow neck of the hourglass is in the center.

HAIRSPAN
LONGEVITY DEFINED

**Supporting Hairspan
is the new goal of
modern hair care**

HAIRSPAN

LONGEVITY DEFINED

Hair is one of the body's most visible markers of inner vitality—yet hair care has long centered on reactive repair, addressing thinning, dullness, dryness, and texture change only after they appear. Today's market largely focuses on correcting visible damage, but the emerging longevity mindset is expanding consumer expectations toward ongoing care that supports hair vitality over time. This shift opens a new innovation space: Hairspan care. Beneath the surface, hair follicle stem cells rely on a carefully balanced scalp microenvironment to sustain healthy growth cycles. When that equilibrium is disrupted by the cumulative pressures of aging, oxidative stress, chronic inflammation, and environmental exposure, the growth phase shortens, follicular integrity weakens, and visible signs of hair aging accelerate. As longevity becomes a defining framework in modern wellness, consumer expectations are evolving accordingly. The same proactive, science-driven thinking that transformed facial skincare is now extending to hair—driving demand for regimens that support the biological systems behind long-term hair health, not just the visible signs of change.

Hairspan—Hairspan is the period during which hair maintains its density, strength, texture, and color vitality—its functional window of optimal health. Rooted in scalp-first science and powered by AC ExoRoot alongside a curated portfolio of biotech actives, the Hairspan Kit is a five-step ritual targeting the five pillars of hair longevity: scalp health, density and growth, strength, texture and manageability, and color vitality. Each step applies targeted skincare principles to both scalp and strand—supporting follicle resilience, buffering daily environmental and oxidative stressors, and preserving the density, softness, and vibrancy that signal healthy, well-functioning hair. Designed for individuals navigating mid-life hair changes as well as those investing in early prevention, the Hairspan Kit reframes hair care not as damage control, but as an ongoing commitment to vitality.

Because protecting what is healthy today is always more effective than restoring what has already changed.

Hair-Dew Elixir

Environmental Defense Mist

Hero Ingredient.

AC ExoRoot defines hair longevity by targeting Hairspan – the biological foundation that supports the time hair stays healthy, resilient and visibly vital.

By reframing hair care as a wellness ritual, hair has become a visible biomarker of internal balance and long-term health rather than a surface-level concern.

Minoxidil opened the door to growth claims, but AC ExoRoot finally gives brands something meaningful to say beyond them. AC ExoRoot delivers hair longevity by supplementing scalp biology – the next frontier.

AC ExoRoot is standardized for IGF-1 activity. IGF-1 is a naturally occurring growth signal that plays an important role in hair follicle activity. It helps support the growth phase of the hair cycle by keeping follicles active for longer and delaying the transition into shedding.

**Increases
IGF-1 synthesis
by +185%**

**Increases
scalp hydration
by +13%**

**Reduces
scalp inflammation
by -30%**

The Fragrance.

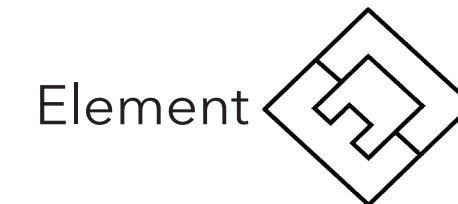

Top: Green Matcha, Bergamot Leaf, Bitter Orange

Scalp Synergy

Scalp Synergy is a lightweight, silky emulsion that hydrates, balances, and revitalizes the scalp – gently exfoliating buildup, soothing redness, and relaxing the senses with mood-boosting actives. Enriched to nourish follicles and support hair growth, it transforms daily care into a foundation for fuller, stronger, visibly youthful hair. Because great hair begins at the root – this is prevention, performance, and pleasure, all in one ritual.

Featured Active	INCI Name	Mechanism	Multifunctional Benefits
 60202 AC ExoRoot	Water & Chlorella Vulgaris Extracellular Vesicles & Phospholipids & Lactobacillus Ferment	Amino acid-rich microalgae that supports biomarkers that help maintain scalp homeostasis and promote healthy hair growth signaling.	<ul style="list-style-type: none"> • Promotes Hair Longevity • Supports Hairspan • Scalp Pro-Aging
 20653SFV AC Vegan Yogurt Hydrolysate SF	Cocos Nucifera (Coconut) Fruit Extract & Lactobacillus Ferment	Created by fermenting coconut milk with <i>L. bulgaricus</i> . A vegan alternative active to moisturize, reduce redness, and help skin and scalp.	<ul style="list-style-type: none"> • Moisturizing • Redness Reducing • Efficacious Soothing Benefits
 22064 AC Water Kefir PHA	Water & Opuntia Ficus-Indica Fruit Extract & Lactobacillus Ferment	A natural and vegan polyhydroxy acid derived from fermented water kefir. It provides gentle exfoliation and promotes collagen synthesis.	<ul style="list-style-type: none"> • Gluconic Acid 18-24% • Gentle Cellular Renewal • Enhances Collagen Production
 12006 AC OleaShield	Lactobacillus & Olea Europaea (Olive) Fruit Water & Lactobacillus Ferment	Harnessing the power of Italian olive vegetation water, this biofermented extract promotes cellular detoxification.	<ul style="list-style-type: none"> • Upcycled • Detoxification • Cellular Reparation
 12048 AC Skinmuni-Tea	Water & Lactobacillus & Camellia Sinensis Leaf Extract & Lactobacillus Ferment	Biofermented matcha tea that supports the mind-skin connection by balancing the skin's microbiome and promoting a calm well being.	<ul style="list-style-type: none"> • Mood-Boosting • Strengthens Skin Immunity • Well-Aging Powerhouse
 M14005 ProBiocin V™	Lactobacillus Ferment Lysate	Offers an optimized production method capturing bacteriocin peptides that promotes redness reduction and scalp moisturization.	<ul style="list-style-type: none"> • Probiotic provenance • Redness reduction • Inhibits <i>Malassezia furfur</i>

DI Water	Water	0.00010	Local
Citric Acid Anhydrous	Citric Acid	0.00010	Cargill Inc.
Formulation Guidelines			

1. Phase A: Charge water to clean and sanitized beaker. Begin stirring at medium to high speed on overhead stirrer (400 -450 rpm). Add remaining Phase A ingredients under stirring.
2. Phase B: Create a pre-mix slurry of the HEC and glycerin by first adding the glycerin to a separate container, then sprinkling the HEC on top. Mix until uniform slurry is achieved. Add slurry slowly to main beaker and allow to hydrate. (1500 - 1800 rpm lab scale). Batch can be warmed to 40-45c at this stage to accelerate hydration of HEC.
3. Phase C: Once the HEC is fully hydrated, remove heat and cool <40c. Once temperature has cooled below 40 c, add ingredients of Phase C to main beaker one at a time with high speed stirring (1500 - 1800 rpm).
5. Phase D: Once the gel is uniform, create a pre-mix of Phase D ingredients by mixing the solubilizer and fragrance together in a separate container. Add slowly to main beaker with continuous high speed stirring. (1500 - 1800 rpm)
6. Phase E: Adjust pH within 5 - 5.5 with phase E as needed- slow additions necessary while checking

Scalp Synergy

Why We Love It
Healthy scalp, stronger hair

Illumi-Luxe Hair Cleanse

Illumi-Luxe Hair Cleanse is a luxurious toning formula that removes dullness, neutralizes yellow tones, and subtly enhances the natural brilliance of gray and white hair. With every wash, it adds weightless volume, infuses moisture, and amplifies silky shine – transforming daily cleansing into a sensory ritual that perfects tone, texture, and luminosity. Because vibrant, radiant hair is a reflection of care – this is purification, hydration, and luxury, all in one ritual.

Featured Active	INCI Name	Mechanism	Multifunctional Benefits
 16810 ACB Pisum Sativum Peptide	Pisum Sativum (Pea) Peptide	Pisum sativum is highly bioavailable, offering a potent solution for anti-aging haircare catered towards volumizing, hydration, and scalp health.	<ul style="list-style-type: none"> • Hair Volume • Hair Pollution Protection • Hair Hydration

Formulation Guidelines:

1. In a clean and sanitized kettle add DI water and begin propellar mixing [200 - 300 rpm].
2. Moderately sprinkle in Naternal Excel to DI water with [300 - 400 rpm]. Increase speed as necessary. Mix until uniform and clump free.
3. Heat to 70 - 75C with prop mixing [300 - 400 rpm].
4. At 70 - 75C add phase B ingredients [200 - 300 rpm] to main kettle one by one in order given. Mix well after each addition. Maintain temperature at 70 - 75C.
5. At 70 - 75C add phase C ingredients [150 - 250 rpm] to main kettle one by one in order given with prop mixing and sweeps [150 - 250 rpm]. Mix well after each addition making sure ingredients are fully incorporated and Hallstar EGDS is completely dissolved [10 - 15 min]. Cool to 35 - 40C.
6. Add phase D premix to main kettle at 35 - 40C with propellar mixing and sweeps [200 - 300 rpm], batch will thin. Mix well until batch is uniform.

Formulation Guidelines

1. Add A items one by one in order given. Mix well after each addition making sure all items are dispersed and clump free.
2. Add B items one by one in order given to main tank while heating to 75-80C. Mix well after each addition making sure all solids are dissolved (500 - 600 rpm).
3. Combine C items in a separate container. Heat to 75-80C and mix until all solids are melted - will remain opaque. Add to main tank at 75-80C at ~600 - 700 rpm). Mix well until smooth and uniform for 15 min. Then homogenize for 1-2 min (4000-4500 rpm) at 75-80C. Return to regular propellar mixing at 600 rpm and cool to 40-45C.
4. Add D items one by one in order given to main tank at 40-45C. Mix well after each addition making sure batch is uniform. Dissolve SF Max powder in Water before adding to batch. Check pH and if no pH adjustment is required cool to 30-35C and homogenize 1-2 min at ~3,500 rpm until batch is slightly thicker and uniform. Stop mixing, let batch stand to cool.

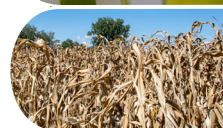

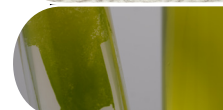

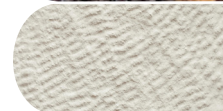

Fortifying Hair Masque

Why We Love It
Strength from within

Hair-Dew Elixir

Hair-Dew Elixir is a lightweight serum that tames frizz, protects against heat, and enhances luminous shine. Infused with nurturing ingredients, it smooths and softens each strand while supporting healthy hair growth — leaving hair silky, polished, and alive with vitality. Because radiant, resilient hair is a reflection of care — this is anti-frizz, protection, and brilliance, all in one luxurious drop.

Formulation Guidelines:

- In a main beaker, combine Phase A ingredients one at a time. Mix using a silverson with fine emulsor screen at 1500-2000 rpm while heating to 80-85C.
- In a separate container, add zemea and HEC to make a slurry. Add slurry to Phase A with continuous fine emulsor screen mixing [2500-3000 rpm].
- In a separate container, combine Phase C ingredients and heat to 85-90C with continuous mixing using a magnetic stir bar.
- Once Phase AB and Phase C reaches 80-85C, slowly pour Phase C into Phase AB with continuous fine emulsor silverson mixing at 3500-4000 rpm. Maintain temperature at 80-85C for 5 minutes with continuous mixing.
- After 5 minutes, allow Phase ABC to cool to 40-45C with continuous fine emulsor silverson mixing at 3000-3500 rpm.
- at 40-45C, add Phase D into Phase ABC with continuous fine emulsor silverson mixing at 3000-3500 rpm. May increase speed as viscosity increases. Mix until homogeneous.
- In a separate container, combine Phase D and mix using a magnetic stir bar. Add Phase D to Phase ABC with continuous mixing.
- Once batch reaches 45-50C, Add Phase D into batch and mix with fine emulsor silverson at 3000-3500 rpm until homogeneous.
- Once batch reaches 40-45C, add Phase E ingredients one at a time with continuous fine emulsor screen mixing [3000-3500 rpm].
- Once batch is homogeneous adjust pH using Phase F to 5.00 (approx 0.068%).
- Continue mixing and cooling until batch reaches 25-30C.

Hair-Dew Elixir

Why We Love It
Weightless nourishment

Environmental Defense Mist

Environmental Defense Mist is a lightweight, protective veil that guards against pollution, humidity, and daily environmental stressors, while leaving behind a beautifully lasting scent. Infused with restorative ingredients, it revitalizes and softens strands while supporting natural hair growth – the final touch in a ritual that preserves brilliance and resilience. Because protected, vibrant hair is a reflection of care – this is defense, nourishment, and indulgence, all in one finishing ritual.

12053 AC Pina Colloida	Water & Saccharomyces/Hydrolyzed Pineapple Fruit Crown Extract Ferment Filtrate & Lactobacillus Ferment	2.00	Active Concepts, LLC
60202 AC ExoRoot	Water & Chlorella Vulgaris Extracellular Vesicles & Phospholipids & Lactobacillus Ferment	2.00	Active Concepts, LLC
20831 ProCutigen® Hold	Phyllostachys Bambusoides Extract & Leuconostoc/Radish Root Ferment Filtrate	1.00	Active Concepts, LLC
Phase D			
Symbio®solv clear plus MB	Caprylyl/Capryl Glucoside (and) Aqua (and) Sodium Cocoyl Glutamate (and) Glyceryl Caprylate (and) Citric Acid (and) Polyglyceryl-6 Oleate (and) Sodium Surfactin	3.00	Evonik Industries
Fragrance	Fragrance	0.40	Agilex Flavors and Fragrances, Inc.
Phase E			
Water	Water	.00010	Local
Sodium Hydroxide NF	Sodium Hydroxide	.00010	Chemtrade Logistics

Formulation Guidelines

- In a main Kettle add Phase A in order, start propeller mixing (300-400rpm) and mix until uniform.
- Once uniform add Phase B, one by one, while mixing, mix until uniform.
- Once uniform add Phase C, one by one, while mixing, mix until uniform. Solution will be hazy.
- In a separate container add Phase D and mix until uniform.
- Once Phase D pre-mix is uniform, add Phase D mixture to Phase ABC while mixing, mix until uniform. Solution should become clear with slight haze after this addition.
- Once uniform, check specifications and drop into appropriate storage container.

Environmental Defense Mist

Why We Love It
Protection that preserves
